> **Availability:** Remote freelance and contract projects, 20 to 40 hours a week. Open to full-time remote roles.

SUMMARY

Senior Frontend and Mobile Engineer with 7+ years of experience building and shipping web and mobile products for teams in Europe, the US, and APAC. Specialist in Angular, React, and React Native (TypeScript), with full-stack depth in Node.js, Express, and MongoDB. Led three engineering teams and a frontend squad, negotiated scope directly with clients, and cut operational costs by almost 70% by focusing teams on business-critical work. Works async-first from UTC+7 and uses an AI-assisted workflow to ship faster without lowering code quality.

SKILLS

Frontend: Angular (v17+), React, Next.js, TypeScript, JavaScript, NgRx, Redux, Zustand, Tailwind CSS, SCSS, Vite, Astro, Vue.js

Mobile: React Native, TypeScript, Redux, offline-first apps, GPS tracking

Backend: Node.js, Express, MongoDB, REST API design, SQL, Laravel, CodeIgniter

Quality and delivery: Design systems, web performance, accessibility, Vitest, Playwright, Git, CI/CD, Docker, code review

AI-assisted development: Agentic workflows, MCP, LLM API integration, Kiro, Cursor, GitHub Copilot

Leadership: Team leadership (3 teams and 1 squad), mentoring, client negotiation, scope and risk management, remote team processes

EXPERIENCE

Senior Frontend Developer, CheckProof

Remote for Sweden HQ, based in Indonesia | Full-time | Jul 2026 – Present

- Build the frontend of a Swedish B2B SaaS used by companies across Europe and expanding into the US in 2026, using the latest Angular and TypeScript.
- Ship product features end to end, from specification to production, in a distributed Europe and APAC team.
- Work async-first with product and engineering in Sweden, and on site with the Indonesia engineering team three days a week.

Lead Engineer, Be Management

South Tangerang, Indonesia | Full-time, hybrid | Nov 2024 – Jun 2026

- Led three engineering teams from client scoping to delivery.
- Cut operational costs by almost 70% by removing low-value features from the roadmap and focusing the teams on business-critical work, which kept releases on schedule.
- Negotiated scope and timelines directly with clients, turning requests into realistic plans and recovering at-risk projects.
- Owned architecture and code review across an Angular and NgRx frontend and a Node.js, Express, and MongoDB backend.
- Wrote the team's remote-work SOP and trained engineers to adopt AI-assisted, agentic development.

Senior Frontend Developer, Nikel (PT Impact Credit Solution)

Central Jakarta, Indonesia | Full-time | Nov 2023 – Jan 2025

- Led the frontend squad that took over a legacy fintech lending platform from an outsourced team in Vietnam and brought development in-house.
- Rebuilt hard-to-maintain modules as a smaller, service-focused app for loan management and repayment.
- Migrated the platform to the latest Angular (v17) and introduced Tailwind CSS, improving security and stability and speeding up UI delivery.
- Built multi-step loan approval flows with role-based access control (RBAC).

Mobile Application Developer, PT Serasi Autoraya (via Esha Parama Technology)

North Jakarta, Indonesia | Contract | Mar 2023 – Jan 2024

- Shipped a production React Native app for one of Indonesia's largest fleet management companies, serving heavy seasonal traffic peaks during Eid, New Year, and Christmas.
- Migrated the codebase from JavaScript to TypeScript and set new coding standards for the team.
- Delivered the B2B feature 40% faster than planned by prioritizing scope and building on the new standards.

Senior Frontend Developer, PT Maju Gemilang Indotech

South Tangerang, Indonesia | Contract | Oct 2020 – Nov 2022

- Led frontend delivery across several product lines on tight schedules with React, React Native, and Node.js.
- Chose frameworks per project to control cost, and set the team's git flow, code architecture, and deployment process.
- Started weekly developer sharing sessions that raised the team's skills and code quality.

Earlier experience

- **Frontend Engineer, Telunjuk.com** | Contract, remote | Jun 2020 – Aug 2020: researched the stack for the flagship product, guided its migration off legacy technology, and built the company design system (Vue.js, Bulma).
- **Frontend Developer, SALT (PT Ako Media Asia)** | Full-time | Dec 2019 – Jun 2020: delivered client features across three projects and supported React Native work.
- **Full-stack Developer Intern, Dumbways Indonesia** | Internship | Oct 2019 – Dec 2019
- **Android Developer, Glovory Technologies Indonesia** | Full-time | May 2019 – Aug 2019: built a cross-platform mobile app with React Native.

SELECTED PROJECTS

- **Hubbly.io:** real-time collaboration hub with live sync and team workspaces (Next.js, WebSocket, Zustand, Tailwind CSS).
- **TRACToGo:** iOS and Android field-tracking app with real-time GPS, route history, and offline sync (React Native, Redux, TypeScript).
- **Hikode THR** (thr.hikode.cloud): gamified holiday-allowance web app built and launched as a personal product.

EDUCATION

Vocational High School, Software Engineering, SMK Negeri 8 Bandar Lampung | 2015 – 2018

LANGUAGES

Indonesian (native) | English (professional working proficiency)
